2106.

S.P.I. 23456 2 plants.
From Nodoa, Island of Hainan, So. China. Presented by Mrs. J. Franklin Kelly, Hoikow, Island of Hainan, S. China thru Fairchild, Reed Aug. 19. 1908.
"Seeds of the Yellow Skin (Iu Foe) a fruit the size of a large marble, yellow skin when ripe with a tart delicious taste. It makes a nice cooling drink & lovely jam, a little like gooseberry in flavor. It grows on a pretty symmetrical tree.
6/23/09 House B.
2107 C IV R XI 1

2107 Castilloa elastica
6/24/09 cut Planted in Flats at Dr. Wilcox's request.
Recd from U.S.P.G. S.P.I (?) 6/19/09

2108 - Mangifera Indica -

DISCARD FEB 11 1910

2111 Butea frondosa
7/3/09 S.P.I 25527 Presented by Rev. E. Bullard from Kavalia, Nellora Dist, India Recd May 17, 09
"This is called in the Telugu language "Sara" tree. The fruit is gathered & the pulp being removed, the seed is cracked & the inside kernels eaten as we eat nuts. It is very rich, & is considered to be very nice, & is eaten roasted a little & if desired with honey or salt. It is very wholesome, but should be eaten in small quantities only at a time, say not more than a handful of fruit. Outside of fruit is not to eaten. Inner kernels sold at 1/2 a qt. Tree grows about the size of a small orange tree."
7/6/09 Planted.
